Adapt - User Stories

Consumer

- As a user I can log into an account and access my personal profile page.

- As a user I can view all stories on the wall, posted by other users.

- As a user I can adapt a success story to my account and set it to be active.

- As a user I can use the built-in submit system to post my own stories with steps.

- As a user I can upvote or downvote a story I have adapted to my account.

- As a user I can comment on stories.

- As a user I can only upvote or downvote a story once, but can change between them.

- As a user I can use a contact form to send inquiries to an administrator.

- As a user I can flag inappropriate stories for moderation.

Administrator

- As an admin I can log into a backend account to moderate posts and other elements.

- As an admin I can add and delete posts from the main board.

- As an admin I can edit or delete comments on any story.

- As an admin I can delete users from the user list.

- As an admin I can receive messages from users about general inquiries.

- As an admin I can view all flagged content to resolve issues.

- As an admin I can view statistics on the number of users, posts, etc.

Potential Features

- As a user I can use a Facebook/Twitter API to like/share a story I liked.

- As a user I can add photos and videos to cement the validity of the story.

- As a user I can create friend links between other users and share profile info.
